

Feedback

There is not enough security in the parking area and we cannot be sure if our vehicles are safe or not. Recently my car was scratched by what clearly looked like a stone but no one was giving me an answer who did it.

The gym provided in the apartment complex has damaged/faulty equipment

Wish the balcony is bigger to accommodate my mini-garden, a swing & a cot.

The society is located far away from the city. Travelling back in night concerns me a bit.

A hot tub in bathroom to help relax after a long day in office

Only one internet service provider allowed in the society but the speed he offers is very bad.

A super deluxe modular kitchen where all the appliances are available which can reduce the cooking time, utensils cleaning time and make cooking even more fun is a dream come true.

Looks like there is an earthing problem only in our building. I keep getting mild shock at times when touching few electrical appliances. Having elders in our house makes this problem more grave

many complained about.

Too many pigeons fly into the balcony and litter the place. No way to stop them flying in.

even at the time I leave to work around mid-day. I feel sorry for that guy but I also feel sorry about our society security

The common areas in the society are not cleaned regularly.

had to call the Facilities Manager repeatedly to get the job done. I was getting my newly bought home theatre system set-up. I agreed to pay the electrician as well.

have a clue what the problem was. After spending close to 1hr he said he will call his boss and never came back. Looks like the shower head needs to be replaced and these guys don't have budget. I always pay maintenance on time.

We don't have a 24x7 grocery store in the society. There is one which gets closed by 9pm everyday and I often come late at night. Many a time felt like having a chilled juice at night but no provision for that.

We don't have a medical store in our society

Water leakage in bathroom and dining hall sink

Ordering a cylinder takes at least 5 days to get delivered as we are located far away from the city. Having a gas connection helps greatly though a little expensive.

It's difficult to find a supermarket at walkable distance outside our society

I have all the things at my flat but very less time to use them

Sanitaryware looks worn out

Generator doesn't start immediately once the power goes off. I think this is happening in all blocks. Certain times during the day I also have to call the Facilities Manager to get it switched on.

Providing a Dishwasher is a basic necessity for any kitchen

WiFi connectivity is the only problem. Poor service by the ISP

When it rains heavily, water starts seeping through the window. I tried to complain but no plumber is willing to come.

Geysers and showers were not working due to heavy scaling in the ground water.

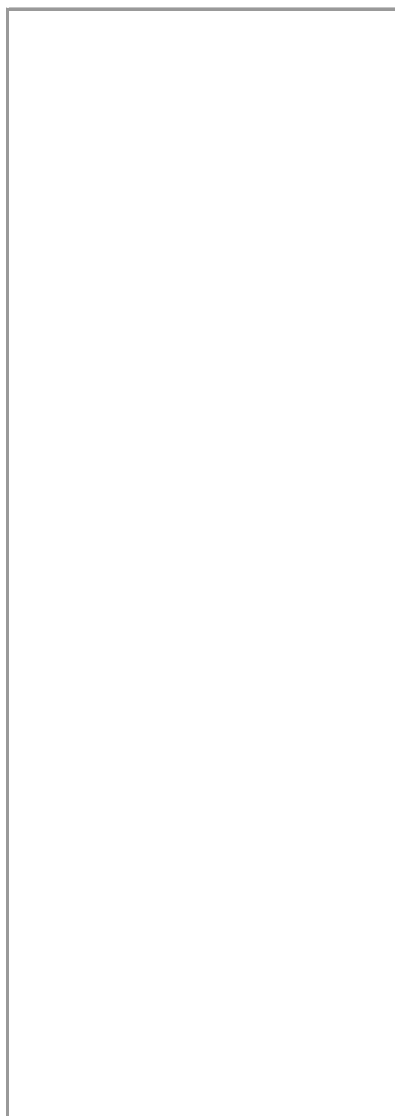

Bachelors stay opposite my flat and I can't describe the kind of nuisance they create.

Electricity is a huge problem. Given the frequent loadsheddings. DG wont support any appliances other than fans & lights.
Cieling fans provided when we moved in are very slow moving.
The kitchen cabinet is not spacious enough to place the utensils and other storage containers
The bathroom sanitary is very weared out. I spend hours cleaning it but it always looks old
We don't have space to do indoor gardening
I am a working mom and would love to have a daycare centre within the society
The security at the main gate doesn't understand my language
The painting of the house interiors is not pleasant
Despite of informing security of a visitor, an important guest, and notifying the same in the app, they still stopped him at the main gate and didn't allow him to come inside. That was a huge embarrassment.
Whenever the generator turns on, all the lights in my flat flicker. Facilities Manager claims all fans & lights in the flat will work. But If i turn on a fan - all the lights will flicker.
opened the door and not my kid.
During summers, the house become an oven. There is no roof cooling done on the terrace.
Water in swimming pool is not cleaned regularly. One day I found a tadpole in swimming pool
Garbage collection staff doesn't come regularly. I often find the garbage cover left at my doorway by the time I come back from office.
Stray dogs are seen quite often in the society. Scared to send kids to play outside.
Solar fencing is broken at multiple places on the boundary wall
Elevators have their own mind sometimes. Doors are shut violently at times and are never shut at other times. It takes atleast 4-5 calls to the Facilities Manager to get it acknowledged.
letters are missing now
Damaged mirrors near blind curves in parking area. Also no speed-breakers adjacent to the jogging path.
Poor ventilation. Even during mid-day I have to kee my lights on
No grills were provided to the windows. I have a 3yr old kid and worried that an accident can happen anytime.
No provision for setting up an AC outlet in the living area.
Woodwork is provided in the kitchen. However the quality of wood is bad. It often gets damp and remains damp getting infested with pests, mushrooms, mites often giving a foul smell
Rain water harvesting pits are not operational. I am concerned that one day we will not get water in our pipes.
False roofing in the flat is damaged beyond repair.
Kitchen drain gets clogged very frequently and complaints to plumber are always not fruitful.
