The society electricity is always unresponsive. On few occasions he left the work in middle and never came back. I had to call the Facilities Manager for help about a faulty power head in my flat. He sent a plumber who didn't have a clue what the problem was. After spending close to 1hr he said he will call his boss and never came back. Looks like the shower head needs to be replaced and these guys don't have fog idea. I always pay maintenance on time.	27	Unmarried	irresponsible

**MY CONCLUSION:-**the main problem is maintenance, Amenities,safety and irresponsible he need to more concentrate on this three because the yop four and half of the people are given feedback on this

my solution :- If he maintaine good maintenance amenities and increase safety in his residential complex and the managers should be responsible and need to be as quick as possible to solve the problems registered by the tenants
